

iCFLow-SET

Configuration kit compatible with ICFlow

With a PC, it allows to configure the parameters of thermodynamic flow transmitter ICFlow.

TECHNICAL SPECIFICATION

Communication interface	PC connection via USB with USB / 232 converter (cable lenght 1,5 meters) and connector for iCFlow included in the kit
Programming software	ICFlow Config
Configurable parameters	output type transmission range characteristics of the duct operating pressure user profile factor
User interface language	Italian English
Compatible operating systems	Windows® XP Windows® 7 (32 bit) Windows® 7 (64 bit) Windows® 8 (32 bit) Windows® 8 (64 bit) Windows® 10 (32 bit) Windows® 10 (64 bit)
Packaging	USB / RS232 converter with cable lenght 1,5 meters memory-stick USB with installation software, serial communication driver and instruction manual
